4K

A heightened sense of security

Sony 4K delivers maximum returns on your investment in video security and surveillance – in cities, public spaces, airports, roads and railways. Class-leading picture quality is teamed with powerful analytics and smart setup, allowing an exciting new range of video monitoring applications. You'll clearly see the difference that Sony 4K delivers in any environment, with dramatically increased efficiency and lower operational costs compared with conventional video security solutions.

SNC-VB770

Ultra High Sensitivity 4K Network Camera with 35 mm Full-frame Exmor™ CMOS Sensor
Thanks to ultra-high sensitivity of expandable ISO 409600, the SNC-VB770 4K network camera features top levels of minimum illumination of less than 0.004 lx - to capture exceptionally detailed 4K/30 fps colour video, even at night and in similar extreme lighting environments.

SNC-VM772R

With four times the resolution of Full HD, Sony's outdoor 4K network security camera brings industry-leading clarity and sensitivity to critical video monitoring and surveillance applications.

Network Video Management System

Network Video Management System enhances Recording, Content Management and Monitoring

The new Video Management System comprises server-based video management software (VMS) and network video recorders (NVRs). It offers monitoring professionals a flexible, fully customizable solution for managing, storing and analyzing video footage from your fleet of network cameras, including 4K.

Note: The SOW-S and SOW-E Series network video management software and HAW-S and HAW-E Series network video recorders are not compatible with each other, and cannot be used in the same system.
